Article published on March 8th 2012 | Software

As iPod has caught heat in the portable video player market, there are increasing needs of video watching on iPod. Many people want to enjoy the FLV video downloaded from YouTube on iPod when moving. But iPod doesn't support FLV video format, though it is a popular online video format and comes with good video quality in relative small size. If you are a Mac user, you must convert FLV to iPod on Mac at first before syncing them to your iPod. Thus you need an appropriate video converter for Mac at first.

Mac FLV to iPod converter

I have looked up for many websites and tried many tools with considering the functionality, user friendly and simplicity to convert FLV video files for playback on iPod. At last I found this software - FLV Converter for Mac. It makes so easy for you to convert FLV to iPod compatible mp4 formats with just few clicks and direct instructions.

FLV Converter for Mac is a full-featured FLV converter which can easily and smoothly convert FLV to AVI, WMV, MP4, MKV and other video formats (vice versa), even can convert FLV to audio formats including MP3, WMA, WAV, AAC, AC3, OGG etc. It also enables you to directly convert FLV to iPod, iPhone, iPad, HTC, BlackBerry and more hot devices compatible formats on Mac OS, which is 100% playable on apple devices.

Key features of FLV Converter

Broad format support - easily convert FLV to AVI, MP4, MKV, FLV, WMV, MOV, 3GP/3G2, M2TS, TS, etc. and also convert other formats to FLV for sharing files online;

Extract MP3 audios, or audios in WMA, WAV, AAC, AC3, OGG etc. from FLV files. So you can enjoy the background music or listen to the whole movie on your iPod or other MP3 players;

Convert FLV files directly to Apple iPod/iPhone/iPad, mobiles like HTC, BlackBerry, Motorola (phones or tablets), game consoles including Sony PSP, PS3 and more.

How to convert FLV to iPod on Mac?

1. Adding video files

Once you've launched FLV Converter for Mac, you can simply drag the FLV video files you want to convert into the main tray. If the files are not at hand, go to the menu bar, and choose File -> Add Video Files to browse your computerâ€™s hard drive for the target FLV videos.

2. Select the output format you want (Apple Devices, Apple Software, Game Console, Common Video Formats, etc.)

Click iPod in Apple Devices to choose output format from the list of available formats, and then set the output file name.

3. Start conversion

After youâ€™ve adjusted all settings, simply click the 'Start' button to begin conversion.

Tips:

Before conversion with this Mac FLV to iPod Video Converter, according to your own needs, you can edit videos by trimming, cropping, rotating and adding special effects. Click Edit from main menu and select editing functionalities.

The Trim helps cut off unwanted head and tail to shorten the video length.

The Crop helps remove black margins or useless parts to tailor the video to your iPod screen size.

The Effect helps adjust the visual and sound effect to the satisfactory level.

The Watermark feature allows for applying an image or a text above the video layer.

Convert FLV to iPod on Mac is that easy. Free download FLV Converter for Mac from Hodosoft to enjoy its wonderful function and well usability.
