This morning I just answered a question who asked on yahoo answer, the question is talking about "How to convert MKV to iPad, so that I can enjoy MKV video on iPad?"

Firstly, what is MKV?

MKV is an open standard free container format, a file format that can hold an unlimited number of video, audio, picture or subtitle tracks in one file. MKV video more exactly is a container, similar to the .AVI, .ASF, and .MOV formats. And its supports several types of audio and video codecs; may also include .SRT, .SSA, or USF (Universal Subtitle Format) subtitles and supports VobSub subtitles from DVDs. If you have got some MKV videos and want to play them on iPad so that you can watch them anywhere and anytime you like, you need to convert MKV to iPad compatible video files like MP4 and MOV before transferring MKV videos to iPad.

Before converting, you should know the best format of iPad is mp4 (H.264/AVC video codec, AAC audio codec), so I think you just need a right converter to convert your mkv videos to right iPad mp4, then transfer the converted videos into itunes, then sync it to iPad. Truly, there's a large number of video converters offer a way to convert incompatible formats so that you can enjoy mkv videos on your iPad. Here is a simple tutorial to guide you how to convert MKV to iPad format video.

Things you'll need:

1. MKV to iPad Converter for Windows

2. A Windows PC

3. Movies or videos in MKV format

Steps to convert MKV videos to iPad supported format:
