How to convert SWF files to MOV Mac by Mina

Article published on August 23rd 2012 | Software

What is MOV File Extension? Why you need to convert Flash SWF files to MOV?

MOV is common multimedia format often used for saving movies and other video files; uses a proprietary compression algorithm developed by Apple Computer; compatible with both Macintosh and Windows platforms.

Though its wide use, You can't directly watch Flash SWF videos in some mov supported player like QuickTime, so that it is inconvenient to play SWF videos on Mac OS. Surely you can download plug-in and choose other media players, but how to edit SWF videos in iMovie or Final Cut Pro? With the circumstances, to convert SWF to MOV is the best solution once and for all.

In order to convert SWF to MOV, we need the Mac SWF to MOV Converter. It's powerful software tool to help Mac users finish SWF to MOV conversion on Mac. In addition, you can convert SWF files to other video formats like MP4, AVI, MKV, WMV, FLV, MPG, 3GP, etc on Mac.

SWF to MOV Converter for Mac enables you to edit your videos like trimming videos, merging videos, cropping videos, add watermark and so on. After converting SWF to MOV, you can paly SWF on Quicktime player, or edit SWF files with FCP, FCE, iMovie etc and enjoy videos on iPod, iPad, iasone etc.

Step by step to convert swf to mov mac .

•Part 1: Convert SWF videos•

Step 1: Free download iOrgsoft SWF to MOV Mac and install it in your computer.You can see its main interface.

Step 2: Load SWF video files

Click "Select File" to load SWF video files you want to burn into into the program.

Step 3: Choose the output format mov in the drop-up list of "Profile".

The SWF Converter for mac supports most video formats and you can convert SWF videos to AVI, MPEG, WMV, MP4, MTS, M2TS, MKV, etc.

Step 4: Click "Start Conversion" to begin to convert SWF video. Meanwhile, You can preview the video during the conversion.
