What is Xvid? How to convert Xvid to iPod? Is there a useful tool to batch convert Xvid to iPod conveniently? In this passage, you will learn useful tips to enjoy your iPod videos.

Xvid is a video codec just like DivX. Most new movies and videos are being encoded with Xvid. Xvid is the best currently available MPEG-4 video codec solution.

Since iPod only supports video formats: MP4 and H.264, it is quite inconvenient if you download video in Xvid format, and want to watch your favorite videos on your iPod. What about using a wonderful tool to convert Xvid to iPod at one click?

Xvid to iPod Converter is a professional iPod converter to convert your Xvid video files into the proper video format iPod accepts, and save your time spending on video conversion greatly. Besides Xvid, a wide range of input video formats (high definition videos included) are supported by this converter: AVI, DIVX, XVID, MPEG, MPEG1, MPEG2, RM, RMVB, MOV, WMV, WMA, MP3, MP4, VOB, SWF, etc.

The intuitive interface makes Xvid to iPod Video Converter the perfect tool for both new and experienced users. With the straightforward interface and easy-to-find buttons, as long as you see the interface, you can handle with the software. What is more, it is a completely clean iPod converter! No water mark or anything on your output video!

System Requirements:

*OS Supported: Windows 98/ME/NT4/2000/XP/2003

*Hardware Requirements: Intel Pentium II 350MHz or above, 64 MB RAM or above

How to convert Xvid to iPod?

* Step 1: Input Video Files

Launch Video Converter and hit the "Add" button to input Xvid files to the conversion list. You can add multiple files in one batch, or drag multiple videos directly to conversion list.

Remove the files by clicking the "Remove" button, while "Clear" will delete all. Drag the bar in preview window to set begin position and end position of the source file, to only convert the segment you like to iPod mp4.

* Step 2: Specify Output Settings

Set the output folder and video profile. All profiles are well configured and have short description of the format and resolution.

If you choose customize setting in profile box, set video and audio type, size, bitrate, aspect ratio and volume as you wish.

* Step 3: Start Conversion

With all the settings done, click "start" to start conversion. In conversion process, a progress bar and remaining time will be displayed. Select the post-process options to automatically shut down the computer as long as the conversion is finished.

That is how to convert Xvid to iPod. Just three clicks, you will finish a conversion to ipod video. It is so easy, is not it? Get an iPod video converter like that to enjoy your Xvid videos on iPod!
