Youtube to PSP converters had played an extremely important role in our digital life. We would always use such tools to convert the ideal youtube videos into our portable PSP format and enjoy such portable life. But there are still some people would ask how to convert youtube to PSP, well, we would explain the details here.

About File Formats

Youtube Video (FLV) - is the FLASH VIDEO abbreviation, FLV streaming media format is a new video format, called Flash Video. The formation of the paper because of its extremely small, extremely fast to load, watch video files makes the network possible, which effectively address the emergence of a video file into Flash, the SWF file so that export a large volume can not be good on the network the use of such shortcomings.

As we all know, the PSP supports the MP4 video format and this is a new container format, a container format allows you to combine different multimedia streams into one single file. Multimedia containers are for example the well known AVI, MPEG, Matroska, OGM. MP4 is the global file extension for the official container format defined in the MPEG-4 standard. MP4 is streamable and supports all kinds of multimedia content, multiple audio-, video-, subtitlestreams, pictures, variable-framerates, -bitrates, -samplerates...) and advanced content like 2D and 3D animated graphics, user interactivity, DVD-like menus.

Step-by-Step guide to convert Youtube to PSP

Step 1: Choose a favorite youtube to PSP tool, download it and install it.

Step 2: Set output format and output folder.

Click "Output format" drop-down button to choose "MP4 Video Format(*.MP4)" as your output format.

After choosing a profile, you can adjust parameters by clicking the "Setting" button.

Click "Browse" button to choose destination folder for saving your converted MP4 files.

Step 3: Add video files.

Click "Add" button to load your video files.

Step 4: Start to convert Youtube to MP4.

Click "Start" button to start the conversion.

Step 5: Finish

Ok, done. Click "Open" button to open the output folder.

Is that seems so easy for you? I guess even the new beginners could quickly and easily convert the youtube to psp video format. By using such convenient tools, you could download your favorite

youtube videos and import them into your PSP just like me. I recently find a lot of such power tools from the hodosoft.com website, maybe you could also have a try.
