How to Get Your Yahoo Mail in Outlook Today by [Dalit Odin](#)

Article published on April 23rd 2012 | [Software](#)

Many businessmen nowadays are using Yahoo Mail and Outlook for their business related tasks. These programs are mostly used by people who own a certain business, but there are also some who use these programs for their own intentions. It's an awkward and stressful situation when you need to switch back and forth from Outlook to your Yahoo Mail.

This is also the reason why configuring Yahoo Mail in Outlook was developed to help you in your daily tasks. Before discussing the procedure of getting your Yahoo Mail in Outlook today, this article will give you a short briefing about the benefits that you can get with it.

There are many reasons why you need to configure your Yahoo Mail to Outlook since it can really benefit you a lot. One of these benefits is that you can access every feature of these programs. Many businessmen nowadays are using this format to save more time and accomplish the other activities included in their schedule. This also helps them to consecutively do their task without being confused.

Configuring Yahoo Mail in Outlook also offers a convenient feature that helps you to send your Yahoo Mail in Outlook form. You don't need to go back and forth just to finish the tasks assigned to you. All you need to do is to setup your Yahoo Mail in Outlook. Doing so will also help you to save more time and effort. Aside from this, configuring Yahoo Mail in Outlook can give you access to important tools such as mailing lists, flags and folders. Your Yahoo Mail messages will also appear on the Outlook inbox similarly to your Outlook mail.

The mails in Outlook and Yahoo Mail are all in the same folder but you can choose to highlight one of the two to easily distinguish between them. Depending on your circumstances, it can be very useful to configure the colors of each program to avoid being confused. For example, if your main Outlook account is for work, and the Yahoo Mail is for personal use, you want to make sure that you don't confuse the two!

You can also use the techniques of messages handling from Outlook and use it on your Yahoo messages. In addition, all the information that you have from your Yahoo Mail such as your tasks, notes, reminders and calendars can also be used in Outlook.

There are three versions of Outlook (namely 2003, 2010 and 2007) still in common use. All of these can be configured to work with Yahoo Mail and each version has its specific instruction to activate the massive benefits that it can give. You just need to follow the correct instructions given by your source to configure your Yahoo Mail in Outlook. This is one place where people get into trouble.

Much of the information available for setting this up is obsolete or irrelevant. That is, it refers to obsolete versions of Outlook, or even Outlook Express, and old program with a similar name but very different benefits.

There are reliable instructions to be found on the Internet to configure your Yahoo Mail / Outlook connection. With the right instructions, the process of configuration is very easy and it only takes a few minutes to set it up.

The link that follows takes you to a web page with proven, tested instructions that show you exactly how to configure Outlook for Yahoo Mail, whether you use Outlook 2003, Outlook 2007, or Outlook 2010.
