# How to make panoramas with Panorama Maker by Adonica John

Article published on November 28th 2011 | Software

Step 1Choose your photos or videos and a stitch mode

Before learn to how to make a panorama with PMK, free download it and install the program in your system. From the Folders Menu, browse to the desired folder and choose the photos or videos for your panorama. And choose a stitch mode according to your needs, e.g. if you have several photos about a lake view, you can select horizontal mode. Then click "Next" button to begin stitching.

Step 2Enhance your panorama photos and preview

For photos, arrange them into the correct order and click "Stitch" button. At this point, you can edit and enhance the panorama by using the editing tools provided. Preview your panorama by clicking the "Preview" or "3D Preview" button.

For videos, click the "Play" button to preview the video clip. Check the "Super Resolution" option for a clearer panorama. When satisfied with the panorama, click the "Stitch" button. Edit the panorama using the provided editing tools. Preview your panorama by clicking the "Preview" or "3D Preview" button.

Step 3 Customize and export

Once your panorama is stitched, you can customize it by adding a frame, personalized title, as well as copyright information. Click "Save" and choose the desired size and format. For 3D panoramas, choose the MPO file format. Or you can also email your panorama to friends and family, from the "Save" dialog box, and choose the "High Compression" option from the "Quality" drop-down box.

Step 4 Print your panorama

Click the "Print" button and select the paper size and page layout. For online printing, click the "Order Panorama" button, how to stitch photos.
