How to Remove Virtumonde Trojans from your computer by Theodore Sumrall

Article published on February 7th 2012 | Software

Computers are one of the most important parts of the peopleâ€™s life in daily routine. A lot of work can be done in computers in much less time, but along with advantages there are a lot of software programs which can cause harm to the computer system. Now a dayâ€™s there are present number of spyware programs which can harm our computer and make the processing of the system slower. Trojans, adware, viruses are the common spyware programs which once get installed on the computer system are hard to remove and can even harm the data stored in the computer.

One of the most common Trojan which is spreading now a dayâ€™s is virtumonde; and once it is installed it is not an easier task to remove this spyware. Due to virtumonde Trojan the user is automatically directed to advertisements which are downloaded by this Trojan. Advertisement windows automatically pop â€“ ups and it irritates the user. It also gives fake alert messages of having viruses and spywares in the computer system. It gives advertisement about fake anti â€“ virus and Trojan removal sites which can even steal our data and browsing history. It automatically downloads files and folders which are harmful for the computer from the internet without even knowing to the user.

Virtumonde Trojan cannot be easily removed from the computer as there is no any official anti â€“ virus available for this purpose. Virtumonde uses java software to get installed on the computer system; we can easily find the installed executable files on the computer. .

We can remove this virtumonde Trojan by using anti â€“ virus programs available on the internet or manually by removing the installed files from the hard disk drive of the computer system.

Firstly we must locate where actually the virtumonde Trojan is installed, we can use the search utility available in the computer system.

After that we have to enter the registry editor where we will delete the installed files. One thing we must be careful about is that the registry editor is main directory of the operating system, if any other file or folder is deleted even by mistake our operating system may gets corrupted. We must find the installed files path in registry editor and delete the installed files.

After that we have to enter the command prompt by hitting cmd in run utility, here we have to change the directories and save the new directories created.

Now virtumonde is removed from the computer system.
