How to Rip DVD to New iPad on Mac by Nadia

Article published on March 15th 2012 | Software

New iPad is coming to the market soon! On March 16, the players are able to buy the powerful device then! It is the best tablet so far in the tablet market. It is excellent enough to make its main competitor Samsung Galaxy Note 10.1 feel nervous and ashame. The A5X dual-qual processor, the HD retina display are the most impressive features of the New iPad and due to the two, the New iPad becomes the most advanced tablet so far.

With the new retina display, the New iPad displays everything more vividly and realistic. The 9.7 inch display with 2048*1536pixel resolution is capable enough make everything shown on it look crisper and more lifelike. So, it is certain that to watch HD movies on the New iPad is a kind of enjoyment.

DVD is one of the most common video format, it wins great popularity through the high video quality. But if you want to enjoy DVD movies on the New iPad, you may feel a little disappointed, for it can not play DVD movies directly. But it is still possible only if you get an DVD to New iPad for Mac.
