How to Use ShowBiz to Edit MOV Files by Allison John

Article published on November 28th 2011 | Software

MOV file is produced by Apple. Inc, and is also called as QuickTime file. Apart from playing-back digital media files, QuickTime enables users to listen to broadcast and receive them on line. Although MOV files have a little lose in image quality, they're still good to play and transfer. Now use the ArcSoft video editing software to smoothly edit MOV movies.

Handy tools are offered to merge, fix, copy, split file clips encoding in .mov. ShowBiz is such a strong MOV video editor that you will fall in love with it at the first look. Here are some tips for ShowBiz â€“ the greatest mov video editor.

How to Edit MOV Files on Windows

Step 1Load MOV files to ShowBiz

Launch ShowBiz on your Windows system. Find MOV files through folder tree, and drop them to storyboard in your desired arrangement.

Step 2Fix MOV files with ShowBiz tools

You can add titles, credits, transitions, effects, and record audios to video clips via using the slider above storyboard. Some basic options like cut, copy, split, paste are offered in a pop-up menu as long as you right-click on videos.

Step 3Export your MOV files

ShowBiz has an integration of exporting solutions covered websites, media files, media devices and disk burning. Let's start ShowBiz journey to edit mov videos now!

Tips:

In the mode showed in picture above, itâ€™s convenient to set changeable volume for each part of audio by dragging the yellow curve. And the bold blue sliders are used to trim audio clips.
