HP LaserJet Pro 100 Color MFP by Theodore Sumrall

Article published on April 30th 2012 | Software

HP LaserJet Pro 100 Color MFP has thin and small sized profile. Despite being small it has the capability to deliver a professional quality color printed documents. The printer also offers an impressive three way network connectivity along with cloud based printing technology. However, the slow printing speed and absence of autoduplexing feature would disappoint the customers.

The HP LaserJet Pro 100 Color MFP delivers a solid color printing, but it is suitable for personal user only. The printer delivers slow printing speed and also offers high printing price per page. The lack of some essential features such as the autoduplexer limits this Printer usability just up to personal use only.

This Printer is similar to LaserJet Pro M1212nf and it is currently available for $350. However, this new model lacks the presence of fax feature. The feature has been cut down to favor the color printing, which uses the HPâ€™s new carousel style cartridge bay. The absence of autoduplexer help the LaserJet pro 100 color MFP to maintain its small size profile. However, it has increase the printing expense and lower down the printing speed. The larger offices require heavy duty printing machine like Dell 1355cnm with multi-functions, but if we talk about HP LaserJet 100 color printer I would recommend this printer for home office usage only, where users can take the advantages from its interesting features such as Smart Install, e-Print feature and auto paper sheets feeder.

The HP LaserJet Pro 100 MFP has exceptionally small sized profile with multifunction. The printer depends on multi color cartridges which increased the printerâ€™s weight. Overall printer weighs about 35 pounds. The printerâ€™s small sized body dimensions of 17 x 16 inch makes it possible to fit this printer anywhere. However, this printer lacks the USB and Ethernet connectivity. Reason for the absence of such features could be, to encourage the Wi-Fi and e-Print service usability.

Setting up the HP LaserJet Pro 100 color is easy. HPâ€™s new smart Install feature makes it easier to establish the connection and proceed with the printing process without any fuss of driver disc.

The HPâ€™s new design and smart feature makes it lot easier to set up the printer. Now, users just need to plug in the power cable to the printer and connect it to the computer via USB connection. Once you switch on the power button, all rest work will be done by the printer itself. The Smart Install feature, which is included in this printer, is very useful during the times, when we need to transfer the printer from current PC to another.
