Internet Explorer Download - No. 1 Choice of Worldwide Users by Janet Fitch

Article published on July 19th 2012 | Software

Till May, 2012, Internet Explorer is still the first choice of internet users according to Wikimedia visitor log analysis report. Why Internet Explorer gained such popularity over decades? For an Internet user, fast and stable are two important features every user wants, with other requirements, like security and easy to use. But unfortunately, some browsers are fast, but take lots of system resources, and are prone to crash. While others are stable but the loading speed is not satisfying. As a browser which fits all these needs, Internet Explorer download becomes the final solution of web browsing.

Letâ€™s see how Internet Explorer outperforms in these aspects:

Interface

The latest version - Internet Explorer 9 has a simple and minimalist interface, with all unneeded buttons and controls removed, but not bring the trouble to find the options you want with difficulty. You can only have address bar and tab there, leaving more webpage viewing area.

Tab

Internet Explorer treats each browsing tab as its own system. If one tab crashes or freezes, it wonâ€™t crash the entire browser. And in the case of unexpected shutdowns, it will restore that tab for you automatically at next time. When you open a 'New Tab' page, you'll be able to see the most frequently visited Web sites. In addition, if you click the link from an existing one to open a new tab, the new tab is placed next to the originating tab, rather than at the end of your list of tabs. This makes it much easier to keep related tabs organized and grouped together.

Speed

Internet Explorer 9 makes web pages fast and responsive by taking advantage of the PC resources and hardware accelerated graphics, making loading times quicker and browsing smoother.

Security

As for safety, the new Tracking Protection and ActiveX Filtering features let you block certain sites from tracking your movements online, and switch off ActiveX elements on a per-site basis.

What is more, users are protected by SmartScreen filter to block websites and files, which are fraudulent or contain malware.

Compatibility

IE is better compatible with some websites than other browsers. For example, when you process an online payment, IE allows the website to launch the related banking application for you. But in Google Chrome, the application cannot be started.

All in all, Internet Explorer is the ideal example of how modern web browsers can and should be â€“ take little system resources while remaining fast, feature-packed and easy to use.

Download Internet Explorer directly from the top download website â€“ bestdownloadreview, an

Internet website that provides free software download and professional reviews. You will not have to go through the tedious processes, just one click on download button, you will instantly get IE. From the download website, you can always get the latest version of Internet Explorer and other web browsers.
