How can i get past the encryption with m4p files on a mac without obtaining the codes and having the authorization so they can be used with my Kindle Fire? when i try connecting to my fire, it says that it can't readable it because it's a protected file. what do i do then? Or is there a program that allows you to convert encrypted m4p files to Kindle Fire?

As we known, iTunes store supplies music in M4A (DRM-free) & license protected M4P and Video in M4V format which prevent the iTunes downloads being transfered on Kindle Fire or portable players but Apple device like iPad, iPhone, iPod etc, so you can find one free DRM removal software to crack iTunes DRM copyright protection first, and then to convert iTunes protected M4V movie M4A AAC M4P music to Kindle Fire supported formats like MP3 file.

Here we highly recommend one powerful iTunes M4P to Kindle Fire Converter for Mac software which can help to transfer/add any iTunes (Including iTunes 10.5) unencrypted M4P music to MP3 for playback on Kindle Fire freely, also convert iTunes music aac to mp3 and iTunes m4a to mp3 for sync with Kindle Fire on mac(Snow Leopard, Lion included) fastly and efficiently.

Meanwhile,the software can also allow to convert any videos to Kindle Fire by converting videos to MP4/H.264 etc for playback videos on Kindle Fire freely,surely, it also offers the professional editing functions like trimming your movie/music clips, adjust contrast, color and brightness, and splice your clips into a cohesive movie/music etc in personalized feel with its easy-to-use interface.
