Join AVI files on mac with AVI joiner Mac by Mina

Article published on May 13th 2012 | Software

Q1: I want to watch this show but I have been trying to join these two avi files for hours. I have used QuickTime...basically all of them! Can someone just try it out and tell me if they are possible to join? I watched the first part but couldnâ€™t get the second one to work!

Q2: Using solidworks i created 2 separate videos and I want to try join them together to create one movie. They only 30sec and the other is 10 sec long. Is there any programmer i can download to do this?

AVI joiner Mac is an easy-to-use and powerful joiner tool to join multiple AVI video files into one larger AVI file mac, join together AVI video files mac, join two AVI files mac, join 2 separate AVI files together mac, join subtitle with AVI files mac.

OS X Mountain Lion AVI joiner is also powerful and efficient to join multiple AVI(Divx, Xvid, etc), QuickTime (MOV), M4V, MPG, WMV, 3GP, FLV, MP4 (inc. Sony PSP and Apple iPod), MKV, VOB and Real Video (RM, RMVB). files into one large video file. You can join as many video files as you wish and easily rearrange their order if needed. Some other software can only join same type of video files but this software can join Different types of video files (with different video formats, different video sizes and different audio formats) into one file without any problem. Best Mac AVI Video joiner is worth of your attention if you need to create video for sharing over YouTube, MySpace, and it is a necessary tool if you need watch movies on your iPad, iPod, iPhone, Blackberry, Creative Zen, Palm, etc.

Guidance: How to join AVI files mac

Step1: Free Download and install the trial version of avi joiner mac.

It's clearly free and absolutely safe to install and run trail version "iOrgSoft AVI joiner for mac", after running it, you will see the main interface.

Step2: Click "Add File" to import AVI files.

Click on "Add File" button, it will open a window; browse the AVI files you wish to Join/combine. You can add multiple AVI files or other different videos files at the same time

Step3: Set output format and output path

Select an output format in the drop-down list next to "Profile" filed. Setup the directory to store the joined video in the "Destination" filed on the bottom.

Step4: Join AVI files mac

Check "merge into one files" on the main interface to join the separate or individual AVI files to a larger video.

Step5: Join AVI files mac by clicking "Start" button.

Start to join/merge/combine several AVI files into one file, then Click "Open" on the bottom middle to find the joined movie files.

AVI joiner Mac is very easy to use and better still it's full functions.

With so many fabulous features and competitive price o, AVI joiner Mac has been very popular among global Mac users and is thought very highly of.
