Kodak Hero 9.1 by Theodore Sumrall

Article published on May 1st 2012 | Software

Kodak Hero 9.1 offers dual paper feeder trays with touch screen display controls and it has an impressive printing speed. The low cost printing and its speed makes it, one of the strongest contenders among the list of printers for house users. However, refilling its tricolor ink tank would cost more than single color cartridges with the passage of time and its 50 sheet paper tray could not be sufficient for small offices with larger volume of printing requirements.

Kodak Hero 9.1 is perfect for those users, which are seeking for multi tasking printers that has the capability to act as image printing device and offers acceptable printing speed. The printer has dual paper sheet feeder and the applications which can make the Workflow into cloud.

Currently, Kodakâ€™s Hero 9.1 is available for about $250. The printer comes with all in one feature that includes the fax machine, dual paper sheet tray, and larger touch screen with 4.3 inches in size and for more extra $50 users can get Kodak Office Hero 6.1.

Other printer that falls under the category of $250 printers include HP, Canon and Lexmark, which also includes the similar features to that of Hero 9.1, however the only thing which makes the 9.1 stand in front of others is its e-mail print feature. This feature enable users to send any email and get it printed in Hero 9.1 via any internet based devices.

Despite Heroâ€™s smaller Output paper sheet tray compared to 6.1, it offers impressive printing performance and efficiency, thereby making it the strong contender among all-in-one printing machines.

Kodak Hero 9.1 printer comes with the tactile keypad, which is supported with speed dial button features making it easier to send the fax to frequently used numbers. Printerâ€™s display is 4.3 inches in size, which is fully touched supported and adjustable. It has slim profile and glossy black and silver colored look. However, this printer lacks more streamline attitude compared to Kodak old ESP line. The printer has small green Wi-Fi LED indicator, which is located at right side of the control panel. Printer has also support ports for memory stick, SD, USB and xD-Picture Card, which is located below the button. Another important feature included in this printer is, double side printing feature. This feature save the paper sheets usage by 50% and it is a new initiative towards green solution. As, per the manufacturer, the Kodak Hero 9.1 has the capability to handle 12,000 printed pages every month.
