The Key to Small Law Firm Profitability - Enroll now and reserve your seat

Attorneys who operate small firms know they have to wear many hats. In addition to casework, there is marketing, networking, professional meetings, client consultations, time tracking, invoice preparation and trust accounting. Do you ever wonder how you can manage the non-income producing tasks and still maintain profitability?

Cash in on Technology

Computers and software have changed how we do business. Today, small companies that embrace technology can compete with their larger counterparts on many levels. Nowhere are the benefits inherent in technology more evident than at small law firms. When you put technology to work in your office, you will enhance your firmâ€™s in-house capabilities and increase profitability.

Selecting Technological Tools for Law Firms

Prior to choosing and implementing technological tools, however, it is important to evaluate available products, understand best practices and the unique characteristics of law firm operations. Tools and technology that canâ€™t handle the intricacies of legal practices can be more of a headache then a help.

Gain Administrative Advantage without Adding Overhead -

Attend our April 12, 2012 webinar , and reserve your seat and find out how the latest technology in time tracking and billing software can give you serious administrative advantage without adding to your overhead.

We will demonstrate new legal software tools that integrate calendaring, case files, time tracking, billing, reminders, collections and even trust accounting. In addition, we will show you how smart software can help you prevent revenue from falling through the cracks, tighten state regulation compliance and streamline your back office.

Easy Soft specializes in helping law firms automate their processes, streamlining repetitive tasks and workflow.
