Mobile application for learner drivers that aids them in preparing for Driving Test by Anand Kumar

Article published on December 30th 2011 | Software

The application targets the people who are intending to take up their Driving Tests for a permanent license. It is a mandatory rule to have the Driving test cleared to procure a normal driver status and to use oneâ€™s own vehicle. With this application on the Smartphone, the users can take online interactive mock tests and assess their preparation. This is not it! The users have the option of keeping track of their progress and monitor the weaker area for improvement. The mock test will help them overcome fear and gain confidence to attempt the real time test very effectively. The interactive and easy to use interface makes this mobile solution stand high among the popular apps on all application stores.

The challenges faced during the application design and development are tackled well with precision which is one of the major factor is making this a successful application on the iphone and Blackberry platform. It is made sure that the information on the driving test is made to collate into one single application. Keeping the user understandability of the Driving concepts, this application provides all the information on various aspects of driving subdivided into various topics. Mock tests on the application enhance the usersâ€™ confidence and thus giving them a self evaluation option about the status of the driving skills that is required to pass the Test. The user will be able to take mock tests and they should be provided with detailed test results. The progress meter in the application is capable of showing the user the scores thus evaluating their strengths and weaknesses.

Since the application had to be used by all age groups the application though has complex functionalities to operate, the easy to use interface makes the application work for the intended task accurately with no complexities in the usage of this mobile application. The application is developed with various other features like special sounds and graphics to enhance the user experience and to interest the users for their preparation of the Driving test. On using this application, the driving learners will be able to gain in-depth knowledge regarding driving test. This app will also enhances usersâ€™ knowledge and skills by allowing them to take up Mock test which are designed in the Real test format. In the mock test, the questions are presented randomly from all the topics using a special algorithm that randomizes the questions every time the user takes a test. The user can also select the number of questions they would like in each test. The user is then provided with the summary of the practice test at the end of each test. It shows the time taken, the score, which questions are answered correctly and where they were wrong, explanation for all questions. Another benefiting feature is that the user can go through their state's driver's handbook / manual with minimum user input.

As mentioned earlier, this mobile solution makes sure that the users can self-evaluate themselves and record their performances to have a look on the progression of their driving knowledge. This option is possible as the solution in the discussion is interactive and easy.
