Article published on June 28th 2012 | Software

Althought everybody knows that iMovie can imports MP4 videos, but you still somebody asked how to import MP4 into iMovie. What's the matter? Well, thatâ€™s because iMovie prefers MPEG-4 and H.264 codecs instead of others. But MP4 is a video container and may contain various codecs that iMovie does not support. Now you may fail toimport MP4 into iMovie , then how can you convert MP4 to iMovie supported mp4 file and import MP4 to imovie?

iMovie is supposed to work with MP4, but not always the case. Becayse MP4 is a file container for video and audio which may contain any number of video, audio and even subtitle streams, making it different to determine the type of streams in an MPEG-4 file based on its filename extension alone.

Therefore, you need a program to help you convert your MP4 video (either downloaded from websites, shot by camcorders or made by other applications) to iMovie MP4, MOV video. Don't worry, this is what MP4 to iMovie Converter can do.

With MP4 to iMovie Converter, you can easily convert MP4 to iMovie recognized MP4, MOV files for free import MP4 into iMovie. Besides converting MP4 to iMovie for importing MP4 to iMovie, it can also convert other video files AVI, WMV, MPG, FLV, 3GP, MKV, AVCHD etc to iMovie for editing.

Step by step to •import MP4 to iMovie with MP4 to iMovie Converter
