Article published on January 18th 2012 | Software

Get secure your system by installing the antivirus software in your system. Moreover, keep updating the software to make it capable to detect latest virus definition and other malwares. However, a complete antivirus package provides you comprehensive security from local drives to internet surfing. If you use internet and mail services frequently you wish to secure it and free from the virus. Thus, here is the information regarding Norton AntiVirus Email Settings. Norton is renowned antivirus program that will provide you complete security whether it is for local drives or email. Moreover, the interface will enable you to configure your settings according to your preferences. If you want to make some changes in your Norton AntiVirus Email Settings, you can easily do after following the systematic process. In some cases the settings of the email could be changed once you install the Norton antivirus so you can configure it again as per your requirements. However, the setting could hinder your setting of sensing and receiving the email properly. In those cases you can change the settings to make it proper to receive and send the mail precisely.

Here is the process to change settings in outlook Express if you are not receiving email due to installation of Norton antivirus

Step1- Start Outlook Express

Step2- Click on Tools option

Step3- Choose Accounts

Step4- Select Mail tab

Step5- Click on the Email account to select

Step6- Choose Properties

Step7- Click on Servers tab

Step8- Change incoming mail server from the previous 127.0.0.1 to mail.expedient.net

Step9- Enter Expedient in user name field and delete all other data

Step10-Now press Apply and click on OK

Step11-Finally close the tab

These all steps will help you to reconfigure your Email settings to get it back on the track. Ultimately, you can easily change the settings to make your email setting proper without any issue. Antivirus software Norton is secure but it changes some settings to secure the internet files and emails. However, you need to make sure that your email setting is not changed after installing the antivirus. Usually, the antivirus scanning email refers to the verifying the emails and attachments that they all are free from the virus and other malwares. Thus, when you install the Norton AntiVirus, it automatically changes the email settings to scan and provide complete secure PC. In this case may be you find some trouble regarding sending and receiving the mails. Usually, the outlook express is covered in the Norton antivirus. So you can easily change the

setting by following the above given process to make it proper so that you can receive and send the emails. Overall, the Norton antivirus email setting could be changed but you can manually change as per your requirements. Hoping this information will be helpful for the users who ever have faced this kind of issues in their system.
