Outlook support to repair Error 0x8004010F: Object could not be found by [IGennie Kumar](#)

Article published on August 17th 2012 | [Software](#)

Microsoft Outlook 2010 is an effective media of communication for sending and receiving mails. But while trying to send or to receive email in Outlook 2010 any of the error messages below might appear:

0x8004010F: Outlook data file cannot be accessed.

OR

0x8004010F: The operation failed. An object could not be found.

Such error messages indicate that MS Outlook was unable to locate and download the offline Address Book. The offline Address Book for your company is automatically gets developed when your company completes a night from the time it signed up. Such Offline Address Book of an organization gets corrupted owing to any of the following causes:

â€¢The Offline Address Book list object comprises of a missing address list.

â€¢The Offline Address Book list object comprises of an incorrect address list.

This is a common error message happens to arise at the inception of a user's joining the service and barely affects your ability to send or receive email. This error is seldom present by the next day and hence no action from the user is ever required. But if you constantly find this error appearing even during the first 2-3 days of signing up as a new customer you may get in touch with an adept online Outlook support service provider.
