ProSeries Tax Hosting Assists in Satisfying Clients by Jameswatson

Article published on December 15th 2011 | Software

ProSeries Tax software assists tax preparers to satisfy their clients completely. ProSeries tax hosting solution helps in satisfying clients in a much better and quicker way. A highly efficient application hosting and cloud hosting solution for ProSeries Tax software program offers many benefits. Some of the major advantages are as follows â€“

Real Time Accessibility For Multiple Users

With ProSeries Tax software hosting, multiple users get simultaneous accessibility to the hosted application at any time round the clock and from any place round the globe via Internet.

Data Backup

ProSeries Tax hosting service provider provisions thirty days of rolling data backups.

Cutting Edge Hosting Technology Is Offered By ProSeries Tax Host

An efficient cloud computing service provider makes use of the cutting edge cloud hosting technology in order to smoothly host clientsâ€™ business critical data and software. A competent application hosting and cloud computing service provider uses the most advanced, latest, and fastest Intel Chips, such as, Nehalem and other allied ones. Nehalem is the codename for an Intel processor micro architecture, and is successor to the Intel Core micro architecture. Intel Core micro architecture was previously known as the next generation micro architecture. Nehalem processors use the forty five nano meter process. The first processor released with the Nehalem architecture was released in the year two thousand and eight. Westmere is the name given to the thirty two nano meters die shrink of Nehalem. The first Westmere based processors were launched in the year two thousand and ten. Gulftown is the codename of a six core hyper threaded Intel processor that is able to run up to twelve threads in parallel. Gulftown is part of the family of thirty two nano meters processors with codename Westmere. Westmere EX is the first Intel Chip to have ten central processing unit cores.

State of the Art Data Centers with Extreme Security

Tax firms use hosted ProSeries Tax software in order to ensure full security for clientsâ€™ data. World class data center facilities are protected by armed and trained security guards twenty four by seven round the year. Security devices like advanced biometric security scanners, automatic fire alarm systems, high quality smoke detectors, twenty four hour closed circuit television cameras, and other various types of security systems are deployed in order to protect its state of the art data center facilities from threats and intruders. State of the art data center facilities are located in seismically safe regions. An application hosting and cloud computing service provider uses Statement on Auditing Standards (SAS) No. 70 Type II compliant and tier four grade data center facilities. At the end of a SAS No. 70 service auditor's examination, that is, SAS 70 audit, auditor renders an opinion on the following - whether or not the service organization's description of controls is presented fairly; whether or not the service organization's controls are operating effectively over a specified period of time (Statement on Auditing Standards No. 70 Type II only); whether or not the service organization's controls are placed in operation as of a specified date; whether or not the service organization's controls are designed effectively. When the service auditor is satisfied with the organization, the service auditor renders what is referred to as an unqualified opinion. Though a Statement on Auditing Standards (SAS) No. 70 audit is technically not a pass or fail audit, the

receipt of an unqualified opinion from the service auditor is usually assumed to be as passing the audit.

Free 24 by 7 Support Service

Customers making use of the hosted ProSeries Tax Software get fully free of cost and twenty four by seven support service from expert support staff.
