Article published on April 14th 2012 | Software

Sudoku is a Japanese word meaning single number. The now worldwide popular game by the same name is a Japanese puzzle that gained fame a few years ago. Sudoku is a logic based puzzle with 9x9 grids that are to be filled with digits 1 to 9. The 9x9 grids further have sub-squares of 3x3 which also need to be filled with digits 1 to 9. All you have to do is arrange 1 to 9 digits once in each row and each column in each of the nine 3x3 grids. This makes it a tough game to crack!

Initially the game was published in newspapers in some parts of the world everyday along with its solution. Slowly and gradually it became very popular all over the world. For most had become a daily routine to solve the puzzle. At the same time, mobiles were largely emerging as a dominating device which was the time when mobile application development companies came up with the idea of developing Sudoku into an attractive mobile game application for tech-savvy users. Then came the virtual Sudoku versions, from which among the best mobile app available in the market today is Silver Sudoku. Its fantastic graphics and visuals grab the attention of the gamer until the game is over or solved. Basically, the game requires us to implement logic, reasoning and interest to solve it. Once you've got the patience to solve it then no matter how long it takes, you'll be glued to it.

Silver Sudoku has three levels to crack â€“ easy, medium and hard. The integration of Sudoku in mobile phones led to the growth of the game among mobile users. This logic based puzzle not only is interesting but also demands brainstorming to complete all levels and create a high score. Each level has 1000 puzzles so in all Silver Sudoku gives you 3000 games in one. Though the concept of the game sounds simple and easy but beginners take some time to get used to the game and develop speed in completing each level faster. Once you get familiar with the game you will naturally pick up a flare and quickly clear all levels. Silver Sudoku has been designed and developed for touch sensitive smart phones. Playing Silver Sudoku is easy, simply tap on a grid you want to insert number in and then select number from the ones that are displayed in the pop up.

This number placement game has become one of the most famous mobile puzzle games in the mobile gaming world. Silver Sudoku can be played with ease as there is no time constrain to complete a level. A puzzle game with more than 100 years of history is once again popularly back in action!
