Start Here to Reset Windows Password by Mollazen, A Windows Password Recovery Tool Provider, A Regular Writer On Software.

Article published on November 25th 2011 | Software

Forgot Windows password? You can use a Windows password reset disk or an administrator account to reset the password easily.

If youâ€™ve forgotten your Windows password and youâ€™re on a domain, you should contact your syste administrator to reset your password. If youâ€™re not on a domain, you can reset your password by using a password reset disk or by using an administrator account.

If you forget administrator password and donâ€™t have a password reset disk or another administrator account, you wonâ€™t be able to reset the password. If there are no other user accounts on the computer, you wonâ€™t be able to log on to Windows and will need to re-install Windows.

Reset Windows password with reset disk:

You will not be able to follow these steps if you have locked your computer.

1. If you have typed the wrong password, youâ€™ll receive a message that says your user name or password is incorrect. When this message appears, click OK.

2. Click Reset password, and then follow the instructions.

Reset Windows password with an administrator account:

1. Log on to the administrator account that you will use to reset the forgotten password.

2. Open Local Users and Groups by clicking the Start button, typinglusrmgr.msc into the Search box, and then pressing ENTER. If you are prompted for an administrator password or confirmation, type the password or provide confirmation.

3. Double-click Local Users and Groups, and then click Users.

4. Right-click the account that you need to reset the password for, and then click Set Password.

5. Type and confirm the new password.

Reliability, ease of use, password reset speed are the important factors you should take into consideration. Most of important, the selected tool should suit you and your case best. If you are not good at computer, Windows Passwrod Unlcoker is an ideal option for you.

Windows Password Unlocker allows you to instantly reset forgotten Windows administrator and other user passwords by creating a bootable password reset USB/CD/DVD. It works for all popular Windows platforms, like Windows 7, Vista, XP, 2008 server, 2003 server, and 2000. 100% security guaranteed. No any damage or loss to your computer data and operating system.

In a word, with Windows Password Unlocker, you can regain access to your computer again in minutes when you forgot Windows password. No need to reinstall Windows or resort to others. Just reset the lost password on your own by creating a bootable password reset USB/CD/DVD though this program. No any data loss or damage occurs.

Forgot Windows 7 password? Just change it with your Windows 7 password reset disk or have a try of Windows Password Unlocker if you donâ€™t have one.
