Article published on December 12th 2011 | Software

Accounting software plays an important role in todayâ€™s business world. It helps you to deliver better services without spending much of your time. It allows you to record transactions, prepare financial statements and reports. Basically this package includes numerous integrated modules such as spreadsheet and word processing abilities. There are modules that help you to manage accounts receivable, accounts payable, inventory and general ledger. There are different packages that are available in the market but it is important to understand the clientâ€™s needs and then selecting the right package. You can easily keep a record of all the accounting and financial related matters. Tally is the most popular accounting software that has made a reputation in the market. The latest version of tally is now in the market and it has come with the latest modifications so that you can perform your task more efficiently. Tally ERP offers the complete business solution and it is highly preferred among various organizations. Tally ERP 9 gives you the scope to handle the accounting and inventory processes irrespective of geographical boundaries. There are multiple currencies and multi-lingual options that help you to carry with your work from anywhere and at any time. The remote access increases the business flexibility and you can perform the business activities in various locations.

There are different features of ERP Tally 9:

â€¢ It delivers high performance business management solution that provides integrated support centre and security management.

â€¢ Payroll, statutory processes and excise can be easily managed.

â€¢ You can customize the software depending upon the requirements of your organization.

â€¢ It simplifies your business processes and enables you to have better control.

â€¢ You can also research on companiesâ€™ financial statistics to better understand the financial status.

â€¢ It is perfect for retail channels as you can function and control from one location.

ERP 9 Tally helps you to make your business life easier and this is the only reason why most of the organization prefers to have tally software as the only accounting software. Communication and collaboration among the different business has become much improved and easier with the tally software. It has improved security system and it is more reliable among the potential customers. It has a friendly interface and can be easily handled by anybody. It does not involve complex features that are hard to understand. It is highly transparent to the customers as you can identify the changes occurring and you can reach the company.
