Tool to Split PST File is an Ideal Solution to Manage Large Sized PST File by Maichaljuly

Article published on June 30th 2012 | Software

The increasing connection with more and more people for personal or business purpose leads to store large amount of daily records in your system. To store unlimited data, MicrosoftÃ‚Â® Outlook email platform is highly supportive that stores bulk data like messages, appointments, to do list, tasks, journals, tasks, etc into PST file. When data is heavily accumulated in PST file, you required tool to split PST file in small parts.

Outlook.pst file is known for high usage in data management. However, increased size of PST file creates problem in data management. You find slow speed of Outlook which is resolvable with none other than professional software solution.

Issues with Large PST File:

The new rising technologies gave birth to competent external software tools with enhanced capabilities. On one hand increasing technologies opened many opportunities and on the other hand these technologies have their own limitations too. people with Outlook, must be knowing that Microsoft-Outlook 2002 and prior versions have file size limitation of 2 GB but in the upgraded Outlook version Unicode PST files are created in Microsoft Outlook 2003, 2007, and 2010.

When Outlook ANSI users face problems in PST file size being small it is not possible to add more data in PST file when reaches to maximum 2 GB size. There are fair chances of losing data because of corruption. In order to avoid such symptoms and overcome problems with PST file in ANSI, Microsoft introduced Unicode PST file with file size 20 GB limitation. This also gives problematic symptoms and after reaching 4 GB, Outlook begins to respond slowly.

Data Deletion can be a Solution To get Rid of File Size Issue: In order to avoid such difficult situation, you can permanently delete some of the files using Shift + Del keys. By deleting some of the less important files or useless data, you can help yourself and maintain file size limit. But following this process, there are risks of losing precious files too. So this process avails no profit. The best solution is to use some professional tool to split PST file into many smaller parts.

External Tool to Split PST File Is The Best Help: To met with an ideal solution to split large sized PST file make an online internet search and avail some competent solution. You can use PST Splitter software to split large sized PST file into many small sized files with different criteria like splitting by date, year, size, and folder. This is fast and reliable way to access your entire data painlessly. Read more:- http://www.pstsplitter.org/tool-to-split-pst.html
