Virscent Technologies Pvt. Ltd., a Brainchild of a team of IIT Kharagpur Graduates, is an IT Solutions Company, offering Web, Security and Network Solutions, IT Training & Consulting and Support Services to numerous clients across the Globe.

The vulnerability of the Web and the ever-increasing demand for high quality technical knowledge forced Virscent Technologies to take upon itself the responsibility of training the masses. We have conceptualized various Workshops, Conferences/Seminars, and Training Programs in the domain of Information Technology & Ethical Hacking, Cyber Forensics, Robotics and Embedded System, Android Application Development, Open Source Linux, Sixth Sense Computing, Next Generation Computing like Cloud Computing and Surface Computing, Web Designing & PHP and Animation. Training programs at Virscent are designed specially keeping the student fraternity in mind.

In these workshops we provide live demonstrations of the latest techniques that would give an edge to the participants over their peers. Our trainers have successfully conducted workshops in more than 150 colleges across India. We are one of the best training companies in the country and we take immense pride in the quality of our workshop.

Apart from workshops we have also envisaged short term and long term courses catering to the needs of the students. We conduct these courses in the form of Summer Training, Winter Training, and Classroom Training. We also offer internships in our company on a regular basis. Virscent also offers customized Corporate Training to various organization in the field of Information Security.

Virscent Technologies also provides services like Website Penetration Testing, Web Designing & Developmemt, Multimedia and Software Development & Support. One of the key features of our company is our Blog which gets around 10000 hits per month. Spectrum as we call our blog, is a medium which is used for dessimation of technical knowledge between our experts and the student fraternity.

With its offices in Delhi and Hyderabad and few other proposed offices in other cities we hope to increase our reach to every nook and corner of the country.
