Article published on February 2nd 2012 | Software

Software as a service or SaaS is a model where the software is given on rent to businesses via internet connection which is accessed by any web browser . Of late this model has become a big hit at business places since people have moved out to appearance for a superior and cheap solutions . If you are among them, believe the following compelling reasons to have it at your workplace from a competent provider in any fine SaaS list.

Saas is cheaper choice: You do not involve some huge number as investment for SaaS software since you need to subscribe. You do not have to invest therefore for license quantity at the start which means that you do not have need of hefty amounts like 5000 dollars which you need for any traditional software. As compared to this amount the subscription fee which you necessitate on a monthly basis is pretty low as you not have to acquire any software .

SaaS has no annual maintenance charge: You will not find any kind of annual maintenance fees while going with SaaS software. However, you need pay 22 percent of amount for the license charge every year if you consider any traditional software. So you save the money involved in the support and maintenance thing with SaaS software on an annual basis. Moreover, you get a number of news updates, announcements and patches list from the SaaS software.

You will not have need of any pricey server with SaaS: The applications which you get for your business operations via SaaS are made offered to the user by their providers using the internet. Their server is in general installed at the Data Centers, this means that they can provide service to number of users while accessing the same single database. The SaaS software is hooked with a wide range of users or companies via the same one database. Therefore you don't have to worry much about the server thing as you simpley enjoy a wide range of applications available from server hosted at your provider's end.

SaaS are simple to manage: The best part of SaaS software is they are simple and easy to manage. You do not have need of any technical expert to manage them which is in general required in case you are using any traditional kind of software at your workplace. This will therefore increase your recurring charge of your company as you have to appoint someone to job this traditional ERP software. However, with SaaS model you do not have to worry around these maintenance and management cost since the providers have to take care of this issue. Plus you get hold up as and when necessary both at the phone or through emails if you find some difficulty without any extra money . Secondly the systems available at the user end are pretty easy to manage.

You get usual back and DRP: With SaaS you get usual back up and disaster recovery programs from the providers. You can find redundant hardware and data transactions in the real time by these providers. No extra fees for these things as these are considered in the subscription fee itself so no extra burden on you.
