Windows Live Support Offering the Parental Care by Neha

Article published on January 17th 2012 | Software

Wandering of any one application that serves the perfect definition of multitasking? Microsoft Windows Live can be the answer. Send e-mail and chat online, share and collaborate, create HD quality videos and panoramas, and express your ideas with the Blog Writer. The whole set come with built in Windows protection. Set protocols as how kids experience the Internet. Put restriction on their online searches, monitor and block or allow websites, and decide their range of contact on the chat and Hotmail. Browsing accompanies Safe Search to enable web filtering to check Internet threats. SkyDrive makes sure that you are surrounded with your digital assets, no matter where you are. You can share photos, videos, documents and more, and thatâ€™s without the need of actual application installed on individual system.

A few features or services such as Windows Mail, Windows Photo Gallery and Windows Movie Maker have been bundled separately in Windows 7 under a new tab Windows Live Essentials. Windows 8 is rumored to extend the functionality of Windows Live SkyDrive, and all related apps will go with it thereby accentuating mobile computing along with satisfying the demand to work simultaneously in a collaborated manner so as to bring effectual result. You can also set permissions regarding accessibility of files and folders under Sharing Rule.

Windows Live Support is available from the brand as well as from the core-customer centric businesses so as to let the program run in a smooth and error-free state. Experts sitting there can help you to setup, configure and manage your account, apart from offering troubleshooting services to put an end to any issues. There can be different problems related to the functionality and accessibility of mail, instant messenger, SkyDrive, Movie Maker, Photo Gallery and other components. Hotmail can have a bad time when itâ€™s blocked or hacked. You may get errors while setting up and configuring other e-mail accounts with the Hotmail, sending/receiving e-mails, attaching files, uploading photos, viewing photos and videos send by others, and collaborating with the Office Web Apps. Security issues can bother you a lot, and it should be handled effectively. Apart from issues related to the Internet connectivity, firewall and browser settings can also be a cause of jinx.

Technicians at Windows live help-desk can help you remotely to fix all problems with the suite. They can setup and configure e-mail accounts, and check meddling issues related to the sharing and collaboration of all type of information including messages, videos, audios, documents and more. Experts can help you to reactivate a shutdown account, resolve problems uploading files, adding photos and files to a folder and can guide you setting permissions for hassle-free and secure sharing and management of data. Experts can assess the system configuration and compatibility and can overcome any issues related to the installation of Windows Live programs. They can evaluate security settings, and can amend Windows Firewall or router firewall settings, which may block the installation process.

Despite all protection, at times, you may feel betrayed and Internet threats taking hold of your machine. The situation may turn from bad to worse, if you fail to take the right action. Thanks, Windows Live Support is a 24/7 service, and is easily accessible through the Internet while sitting at the comfort of your home or office.
