How cricket and netball coaching software can help speed up skills training

by Andrew Wilkinson

Article published on April 5th 2012 | Sports

Technological advances in software development have transformed the world of professional sports with detailed analysis, statistics and coaching aids now available at the press of a button.Bespoke digital software developers have since taken this a step further and created intelligent software applications that can be used for all levels of competition.PE teachers in schools and colleges are quickly learning the benefits of coaching software covering a wide range of sports, including cricket and netball.

For aspiring wicket-keepers, bowlers, batsmen and all-rounders, cricket coaching software tailored towards individual needs is becoming an essential piece of kit; perhaps almost as important as bats, balls and gloves! Also, coaches can make netball training drills come to life with netball coaching drills that pinpoint each element of the sport.One of the fundamental aspects driving the success of coaching software is that this blended approach to training encompasses both traditional methods and experimental techniques while harnessing the learning power of computer software.

With a focus on skills training, aspiring cricketers and netball players can benefit from coaching that isolates their individual developmental areas rather than focusing solely on whole-group drills that might not suit their requirements.Whether you are a coach or a player, learning through games as opposed to a drill-based approach is a fun and interactive way for you to reach your own goals.

Once the games and practices are completed,youâ€™ll soon find that the skills youâ€™ve learnt through using cricket and coaching software are transferable to a competitive sporting environment.

This quicker computer-aided approach to developing and improving cricket and netball skills is an ideal way for coaches of all levels to take control over planning their sessions and enhance individual players as well as whole teams.

Functional and fun

Software developers have designed and created hundreds of games with the intention of teaching cricketers, netballers and coaches more about the key elements of the sports.Core areas covered in the cricket version, including wicket keeping, different types of fielding, running between the wickets and how to select different shots at the right time.Netball coaching software helps teach players about moving into space, passing, anticipation, defending and much more

besides.Meanwhile, a smart activity selection screen helps users find various sub-categories and narrow their search to provide an accessible breakdown of the games, activities, practices and skills.

The ease of use and functionality of the software is what makes it so appealing to coaches. Entire sessions can be crafted, saved and even printed out for future reference. Visually demonstrative animations clearly displaying the aim of games and practices are included to highlight the areas being focussed upon. The equality cricket or netball coaching software applications only require onlys the most basic of PC specifications and will help make learning new skills is made quick and easy.

Find out today why top coaches and PE teachers are choosing to plan their cricket of netball coaching sessionsusing intelligent applications designed to help them get the best out of individuals and teams.
