Article published on April 18th 2012 | Technology

With widespread technological development over the years, life has been becoming a lot simpler for people. Particularly, the advent of internet has contributed a lot in terms of convenience and availability of a large number of services under a common platform.

Talking of the banking sector, transaction procedures have undergone a mammoth change over the years. It is not that the traditional form of offline pen and paper baking have been disappearing fast, but with the introduction of atm machines, depositing or withdrawing money from a bank account have undoubtedly become a cakewalk for most people nowadays.

ATM stands for Automatic Teller Machines. These are specially designed electronic machines using which people can make the necessary transactions to their banking accounts without needing to visit the bank. Bank provides their clients with magnetically coded plastic ATM cards, which is ready by these machines and transactions followed based on the requirements of the user.

Atm services have been gaining tremendous popularity over the years, primarily due to their convenience, simplicity of handling and most importantly instant transactions. Take a look at some of their primary advantages listed below: -

ïƒ˜ ATMâ€™s provides services 24 hours round the clock. Therefore transactions can be made as and when required.

ïƒ˜ Nowadays, most banks have been installing a lot of such machines in different corners of the city, particularly the common public places. This has made it a lot more convenient for people to transact.

ïƒ˜ It saves a lot of time for the people as transaction in this form is instantaneous. Furthermore, it helps in reducing the work load on the bank branches.

ïƒ˜ As the process is purely computerized, the chance of errors are nil which is one of the most common problem with traditional dealings.
