Biometric Time Attendance System in Orissa by Bimalendu

Article published on December 27th 2011 | Technology

All companies or any organisation use time and attendance processes to gather information about the total time employees spend on the job.

The most common tracking is capturing the accurate time of each employee and the actual hours they spend on the job.

But few companies track detailed information on each day work task on paper manually.

Time attendance devices were invented many years ago to help HR system, remove the burden of manually recording time and attendance data on paper.

Many companies are using different types of Time & Attendance Systems to capture accurate time of each employees.

Biometric Time & Attendance System is the most secure and convenient to tracking the employees punching time.

Formula One Solutions is among the most expertise solution provider using this technology.

We are providing our own PC based Time Attendance Software (ATA) application that will automatically create timesheets for each employee.

That Automated Time & Attendance software (ATA) allows companies to track and evaluate the performance and work activities of employees using a single software application.

ATA enables employers to store, track and organise the most important employee time related information in one place.

Everything needed to track and monitor employee activities and management processes is available on a computer.

This can also be invaluable for ensuring regulatory compliance with working regulations and proof of attendance.

Time & Attendance System Prices vary depending on needs, with a small business system costing from Rs.10000 to onwards and larger systems supporting many complex functions costing from Rs.25000 to onwards.

Biometric Time & Attendance System will protect a company from potential payroll fraud, provide electronic data and will give employees confidence in the accuracy of salary payments.

These Biometric Time Attendance Systems are also called Fingerprint attendance system; Fingerprint & RFID Attendance system; RFID Time Attendance systems; Electronic Attendance systems and many more.

We offer you solutions in Biometrics, RFID, Smart Card, Time and attendance,Access Control, Visitor management, Canteen Management and others.
