Article published on January 10th 2012 | Technology

Laptop and many other devices require AC power to operate. In most of the places, you will receive direct current. For example, if you are travelling in a car and want to operate your DVD player, then you should have a DC current. However, vehicle provides direct current and you need to convert them by using the Inverter. There are many companies which have introduced numerous invertors. Inverter prices in India are affordable. Most of the people are using this inverter to avoid damages in house. The price rate is varying based on the type of inverter. There are two different types of DC to AC inverter available. One model generates a changed sine wave and it is commonly used item. This inverter is less expensive than the alternative. The other model inverter produces a pure sine wave. The benefit of this inverter is that all AC devices can use this.

This Pure sine wave inverter is more expensive. Its price is five to ten times higher than the modified sine wave inverter. All manufactures have introduced this both model. Moreover, the inverter is based on the model, brand name and its features. There are different brands which have understood the people needs and budgets. They have come up with many inverter models. You can choose any model that matches with your requirement and budget. Whether it is a cheap or costly inverter, it delivers reliable power back. Nowadays, this dc to ac converter is needed by all kinds of people. The designs are very impressive and provide long lasting life to the users. This is very compact and simple to use. Internet is the best source to check the Invertors Price.

Microtex Inverter is one of the most popular inverters in the market. This has also introduced varieties of models. This Microtex Inverter price is starting from three thousand rupees to sixty thousand rupees approximately. The first thing to consider is that which purpose are you going to use this inverter. If you are going to connect simple electronic device, then cheap inverter is good to buy. This Microtex Inverter fulfils all your electrical needs and gives better performance. This model comes with LCD display and it is highly reliable. It also comes with many indications such as full battery, low battery, fault and output overload. Microtex Inverters price is quite reasonable as well its exterior look is awesome. The charger type is 9A multi stage battery.
