Cinema 3D from LG Offers the Latest in 3D Technology

by Barry Knightly

Article published on November 28th 2011 | Technology

For the ultimate 3D experience, look to the Cinema 3D range from LG with its of-the-moment technology, you the viewer are able to view not only the latest television shows and movies in stunning 3D, but also full HD.

As is expected with all LG products, no less their monitors, the range boasts a streamline design as well as easy installation, allowing you, your friends and family to enjoy a range of multimedia with ease.

2D to 3D

The DM50D Series allows any 2D images to convert into a 3D view without the need for a PC.

This function enables the enjoyment of 3D technology, without original 3D contents. What this means for you, your friend and family is that you can now also enjoy various 2D contents like films, pictures and even TV in stunning 3D views.

3D Effect Mode

3D monitors from LG, such as the DM2350D model, provide vivid and clear 3D imagery through the brands 3D Effect Mode.

The 3D Effect Mode sharpens the borders of dark images allowing users to experience clearer 3D picture quality and feel greater depth in 3D â€“ much like that of the cinema viewing experience.

Full HDTV with DTV Tuner

Enjoy real viewing pleasure with full HDTV through the DM2350D's built-in DTV tuner.

Supporting everything from MPEG4 and DVBC to DVBT â€“ as well as other digital TV broadcasting standard signals.

Surround Sound

LG's Surround X maximizes the reality of watching television or film, by delivering vivid 3D sound.

The surround sound system reproduces crisp and vivid sounds bringing to life the experience of watching 3D television or film â€“ as well as playing games and listening to music.
