Different Types of Motorola Radios by [Julia Roger](#)

Article published on December 8th 2011 | [Technology](#)

Motorola is a company that has long been in the world of communication and is amongst most reputed brand names in the world today. . One of the public and government safety devices is motorola radio which is generally a two way radio that can communicate words between people at distinct locations and make the whole group informed with a single massaging system. There are generally three types of radio manufactured by this company which are categorized as mobile, portable and fixed station radio. The main job that these radios perform is to improve the response in critical situation such as war, terrorist attack and natural calamities.

The mobile radios are vehicle mounted and are the best way to communicate in any part of the world. There is a good range of mobile radios manufactured by Motorola to suit all your industrial needs. The portable radio system which is also known as mototrbo is double in capacity and has a good audio quality which is better than any other audio system and has integrated data application. The display can be either alphanumeric or numeric and it can also be a GPS or non GPS device. There are 160 channels available with UHF and VHF technology. With Motorola portable radio you are going to get a compact microphone and at the same time two years warranty and also an additional year of servicing. The fixed station radio is for the high profile business and designed to cater to its needs. It is a system that facilitates the coordination of the system resources and the consoles and repeaters in it are quite powerful to widen your reach.

Motorola has been a world leader in two way radios and it has customer all over the world. The company believes that when at a mission or work you need to focus on it and not on the technology and its complexities.
