Digital TV Experience is enhanced with Latest Technology by Treeves

Article published on February 3rd 2012 | Technology

From the days of black & white pictures to color images, the television service industry has come a long way. Continuous innovations in the field of communication have led to creation of several user-friendly features and options. The days of TV with limited channels and specific type of shows have grown up huge entertainment value with hundreds of channels displaying diverse programs and shows. There are numerous channel packages to suit the community needs of each geographical location starting with movie packages to education, religious, and history and sports channel packages. The antenna method of connecting TV services to homes has paved way to some of the latest transmission techniques like satellite method, cable wire connection and fiber optic mode of transmission have excelled in providing the best entertainment value to customers in the present world.

You get the feel of theater quality experience with the present generation advanced TV. The high quality picture and great sound caliber to suit it matches nothing in the world. You even get the option to sync entertainment attributes to many of your devices like computer, phone etc. Now, you can manage all your contact and photos from your PC to television. Sync photos and personal videos on to TV and cherish those moments with superior picture quality and clarity. You can download schedule apps to your computer and phone and start managing TV remotely. You get the flexibility of setting the DVR options from any location with the use of these gadgets. The advanced DVR also enables you to watch favorite TV shows from any location in your house. Digital TV comes at a great value and mobility like never seen before.

A great feature of modern-day digital TV is the parental control options. This option allows you to control and block unimportant channels with easy settings that you do not want your family to watch. Digital TV resources are equipped with user-friendly settings and options that help to make apt programming choices for your family. It also comes with the easy option of unlocking all the settings in click of the button. The easy to use training materials, tips and guides take you through the process without making it a mess. The present day TV connection offers a suite of educational and kids channels, enjoyed to the most by kids. It provides necessary tools to manage childrenâ€™s use of television.

Apart from offering family friendly channels, your Digital TV comes with a set-top box that helps you to manage and control your kids TV time. All this can be done with the use of remote control in just a push of a button. With the use of the TV set-top box you can block shows rated as per the ratings. You can even block shows that are not suitable to be viewed by your kids. All you have to do is go the settings menu, choose parental controls to get into the options, select the content and lock it. You can block the show or an entire series that you feel unsuitable for your kids. You can also restrict your kids TV time during a specified hour of the day. For instance, after bedtime or during home work time if you do not want your kids to watch TV you can block TV access according to time slot. An easy option allows lifting the restrictions any time you want by just entering the PIN. All the channels you have subscribed from your service provider will be available to view in an instant. Some of the service providers like FiOS TV are equipped with such great features to give you ultimate digital TV environment.
