Fascinating Features of Motorola XPR 6550 by James Blee

Article published on January 30th 2012 | Technology

The motorola xpr 6550 comes with some fascinating features which can greatly add value to the device. The device gives you some of the best possible features combining the power of voice and data capabilities to add to the benefits of an extended coverage. What makes the device so useful is the fact that it is scalable to accommodate thousands of users at the same time over a wide area. So, you have the choice between enhancing the site coverage capabilities as well as to include more locations in the wide area that the device can already cover.

xpr6550 from Motorola comes with a wide area of customizable applications which add to the productivity and management of a system. Whether it is work order tickets or email gateways, tracking the location of your assets or dispatches, you can be on top of your game at all times. With this advanced device, it is also possible to open gateways of communication between multiple mobile phones as well as radios. It is also possible to use the device for emergency signaling as well as to communicate critical piece of information in the middle of a process. There is room for privacy as well with this communication device making sure that confidential information stays that way. In fact, a fascinating feature of this device is the ability to send text messages to specific parties when some discretion is required in transmitting information and you do not want to interrupt others on the channel. Apart from good security features, the device also lets you alert others especially supervisors with the single click of a button. It is also possible to store a large number of contact details for your benefit
