Article published on January 5th 2012 | Technology

In the super paced world of virtual and digital communication, the technology has helped various people stay in touch 24/7 and at the same time, it has also enabled us to carry our favorite in any format we want irrespective of a place or a country which is great.

In the same context, there have been equipments like fiber media converter that have helped network two devices and make our life simpler.

A Fiber Media Converter is nothing but simple networking device that enables devices to connect and transfer files, which are not similar to each other in functions and properties.

The fiber media converter came in to existence some two decades ago and has gained importance in interconnecting fiber optic cabling-based systems with structured cabling system which is copper-based.

With the help of a fiber media converter, various kinds of data communication based systems/devices formats could be changed like Ethernet, Fast Ethernet, Gigabit Ethernet, DSE/E3, TI/EI/JI along with other multiple cabling styles like twisted pair, multi-mode, single-mode fiber optic and coax etc.

Fiber media converters can even connect numerous Local area network (LAN) media, modifying duplex and speed settings. Another key benefit of fiber media conversion includes providing a graduation migration path from copper to fiber. It is also a known fact that fiber connections can reduce electromagnetic barriers or interference.

A fiber media converter could also be posed as a cheap solution for those who want to purchase switches for use with fiber but do not have the required amount of funds to buy them, an option of buying ordinary switches and its usage to use fiber media converters to use with their fiber networks are also available.

Thus, Fiber Media Converter emerge as one of the simplest yet an easy way to convert various types of appliancesâ€™ formats and connections. Thus, what are you waiting for? Just use fiber media converter help you have a better and a technologically advanced life!
