Article published on April 26th 2012 | Technology

Golden Frog is a sensational worldwide company. It is a global company that develops software and applications. These are dedicated to improving their customerâ€™s privacy and security when using the internet. Some of the signature services and software associated with the Golden Frog Company are like the VyprVPN, Mimo Usenet and the Dump Truck.

VyprVPN

The VyprVPN is a virtual private network that is used in protecting the usersâ€™ identity when online and also preventing snooping and security breaches. To be able to do this, VyprVPN uses some features. L2TP/IPSec protocol is one of them. It increases the security options and can be used with desktop and even iphone. NAT firewall is also another feature. This will be a packet filter to the Virtual Private Network. VyprVPN secures your internet and can be used to prevent hijacking of your personal sessions. It also increases compatibility and has stronger encryption.

The Golden Frog VyprVPN has the ability to bypass the internet restrictions that are imposed by the governments or other agencies. One can also encrypt the internet location and protect against being located where you are. Recently a server in the U.K was launched which accept all protocols. There are also many other servers such as in France, other European countries, North America and the Asia Pacific.

VyprVPN had been upgraded to the Beta version 1.0 in the month of February 2012. This version supported multi-languages. It supported major languages and also had more stable PPTP and L2TP. The speed and the interface use had also been improved. A new version 1.1 has been released in March with more upgrading from the version 1.0. A new server is Austin Texas has also been launched and it supports all the protocols.

Mimo Usenet Browser

Mimo Usenet Browser is another of the Golden Frog signature services. It features a binary search of 800+. This browser is a cross platform and has integrated thumbnails with high speed. It is available for the Giganews Diamond members. Customers have also praised it for being consistent and smooth. A new version of the Mimo was also released, the Beta v0.2.1 which had more increased peed and stability. Recently it has been upgraded to version v0.2.2, v0.2.3, v0.2.4

Dump Truck

Golden Frog has also released a personal storage service that is available to the Giganews Diamond members. This is the Dump Truck, where the users can store their files online securely. This is available to the Giganews members. The Diamond members can store up to 30GB while the members from other accounts have 5GB storage.
