Article published on November 22nd 2011 | Technology

Do a research on the latest gadgets and choose the system that works well l for you. Let me remind you that this investment is worth your money, time and effort. UK stands out as an all-time high user of CCTV, finding the monitoring systems useful for public facilities, residential subdivisions, and parking lots. In order to get the latest and best featured security system, one will have to shell out more money to get better performance security system. Of course brand matters, as it comes with a good quality and also comes with a customer support, which will help you in case anything goes wrong during the set up. A good system would carry higher resolution, larger formats, and better sensitivity. To get a system you will need to shell out $150-$250 depending upon the system.

The PTZ (pan tilt camera gives a wider coverage and would cost you $1,500 to $5,000. It comes with a controller which needs to be operated by a person to control the camera. Generally, the Security Cameras do not come with the lenses; therefore you will also need to purchase the lenses for the camera. Although if you need the cameras with fixed focal lengths you need not shell out more money. Choose the appropriate monitors for the CCTV cameras. Let me remind you that these monitors will be on 24 hours. You can use the TV for it but you the TVs are not built for these purpose. Pick up a flat LCD that generates less heat and take up less space. These monitors come with exceptional resolution and give you a good vision of the cameras.

Do not shell out more money on the monitor as a 9 inch monitor works perfectly fine in order to merge multiple images from different cameras. Do have an idea of number of cameras that you require to complete the whole area. After surveying you would have an idea of the head count of the cameras you would like to set up.

Areas such as terminals, taxis and stands, train stations, phone booths, vending machines and ATM locations have been set up with CCTV security systems which provide safety. The crime rate has fallen down with 75% rate and the main reason is stated as CCTV cameras. The reason behind it is the hidden cameras capture the image at a wider angle and provide proofs as the video gets recorded. There was also news about the CCTV cameras which have been set up in London to fight crimes. There are about 10000 cameras that protect London and help in fighting crimes. The CCTV systems better security in knowing who is stepping out of the car in front of you home and who is knocking at the door. For business driven people, the Security Cameras help in providing security to the premises as well as provide security to the staff of the company.
