Article published on January 27th 2012 | Technology

The High Tech Computer (HTC) Corp has released its latest Android smart phone HTC Rhyme. Without any delay letâ€™s go and have a look at features of this smart phone.

If we have a first look at the phone, many will be impressed at the way it looks. Some get an idea that it may designed for ladies especially because the rear part of the phone is completely with purple color. It is light weight phone with just 130.7 grams, which very much lesser than the iPhone 4S in terms weight.

The screen designed with 3.7 inch S-LCD touch screen with a resolution of 480Ã—800 pixels. In the display wise it is very impressive as the contents in the phone clearly visible. But the down side is that the screen contents are difficult to read under the sun light.

The HTC Rhyme is well equipped with QWERTY keypad. The keys big enough which enable the user easily enter text.

If we look at the features of the phone, it runs on Android 2.3.5 Gingerbread and has 6 variations of screen lock. It has new and completely unique widgets on its home screen. It contains an internal memory of 4GB and also expandable up to 32 GB. Just like a normal Android phone it also contains pre installed apps such as Google Search, Maps, Gmail, YouTube, Google Talk and Document Viewer.

The HTC Rhyme is provided with 5MP camera and capable of capturing images with high resolution 2592Ã—1944 pixels which really a impressive feature. Additionally it also contains a VGA camera intended for video conferences.

When we look at the connectivity, the HTC Rhyme offers all the latest trends in connectivity. It contains quad band GSM/GPRS/EDGE, the 3G technology, Wi-Fi, Bluetooth 3.0 and also the DLNA support. It can be connected to the pc using HTC sync and you can manage all the data transfer between the phone and pc.

There it not much to talk about the HTC Rhyme in multimedia aspect. It only supports the avi and mp4 formats. All other file formats such as MKV, MOV, DivX and rmvb files are not supported within this phone, which is definitely a negative point.

The accessories that are provided with HTC Rhyme are a charger, MicroUSB cable, Headset, 4GB microSD card, Docking Station and User Manual.

It has a battery type of standard Li-Ion 1600 mAh and provides a talk time of around 5 hours.

This phone is available in Plumb, Hourglass and Clearwater colors

Finally the cost of HTC Rhyme is $450.
