HTC Vivid Mobile Phone- the great one Vividly by Sushant-tech

Article published on December 8th 2011 | Technology

HTC is a very well known brand in the Smartphone arena and it is also focused on premium market where it is offering quality products and services. HTC is competing with Apple, Blackberry, Sony, Samsung etc. For the first time HTC has launched HTC Vivid Smartphone 4G LTE technologies with capacitive multi-touch screen. It is offering ample of features 4.5 multi touch screen, where you can enjoy with SMS, MMS, email, video capturing, an 8 MP rear camera & 1.3 MP for the front side, Accelerometer sensor, Light Sensor & Proximity sensor gives awesome result where you can feel â€œValue for moneyâ€•. And of course it will be working on Android OS v2.3.4 which also includes many other brands.

HTC Vivid Smartphone features Android 2.3.4 (Gingerbread) operating system which giving you enhanced experience with latest technology which is known as 4G LTE technology, 1.5 GHz dual core Qualcomm APQ8060 processor, 1024 MB RAM with 16 GB memory which is expandable up to 32 GB by micro SD card & micro SHDC, 8 megapixels camera (1920x1080 pixels resolution) 60 fps with dual LED flash light, 1620 mAh; long life battery, 4.5 inch (540 x 960 Pixels) screen with Multi - Capacitive Touch screen & S-LCD Technology, Accelerometer sensor & Proximity sensor, it is also offering Wi-Fi (802.11 b/g/n), Bluetooth 3.0 for communication network, USB ports micro USB 2.0 and much more other features where you can operate easily and of course feel joy.

There is no doubt about HTC brand, it will give you good performance with quality features and HTC is also regularly updating its brands, coming with advanced features in the market. HTC Vivid Smartphone has a cost of only 199.99 USD which is a very economical price in this range and you are getting real â€˜value for moneyâ€• brand with advanced features than other brands in this range. The battery can run up to 8 hours in talk time mode and up to 395 hours in standby mode, thatâ€™s a long life for the battery, Bluetooth v3.0 is also advanced version where you can transfer data much faster than v2.0. And now, Bluetooth is also available v4.0.The other important thing is that it has capacity of 1024 MB RAM which is a very unique feature in such Smartphones.
