Know About the Different VyprVPN features by Henry Hernandez

Article published on April 26th 2012 | Technology

VyprVPN is one of the best lines of defense and ultimate solution when it comes to secure internet browsing. It incorporates all the features of an ideal Virtual Private Network ensuring that your data is safe from security breaches every time it is transferred online.

With the ever rising number of cases of cyber crime being reported, secure internet browsing has become a major concern for most internet frequenters. This is more so especially when one is using vital details such as credit card numbers. If proper precautions are not taken, vital data could end up in the hands of the wrong people leading to dire consequences. It is purposely because of this reason that Golden Frog introduced VyprVPN. VyprVPN is a Virtual Private Network that ensures that your browse online without the risk of security breaches by using data encryption technology. When you are using VyprVPN, your server location information in the final destination is indicated as one of the VyprVPN global points of your choice instead of the original server.

In order to effectively ensure secure browsing, VyprVPN is loaded with several features that include;

- Speed: Golden Frogâ€™s VyprVPN is one of the networks that ensure safe internet browsing through a Virtual Private Network without compromising speed. In order to ensure that speed is maintained, Golden Frog develops its own VPN software, owns the hardware used and controls its own network. By eliminating other parties, they are able to deliver on speed.

- No speed restrictions: VyprVPN has no limits on the speed regardless of the usage and downloads. You can easily switch between unlimited servers and IP addresses without compromising speed or incurring any further costs.

- VyprVPN App: The VyprVPN App is usually a free addition to the VyprVPN account. The app is downloadable and its main role is to ensure that you can switch between different VyprVPN servers in any location in the world and different VPN protocols freely and with just one single click.

- Unlimited security on any device: VyprVPN has no preference on the type of device being used and will avail maximum security to any device. Some of the devices that it secures includes; iPhone, iPad, Mac OS X, Windows 7, Windows XP, Linux, Windows Vista and Android.

- Multiple locations in the world: VyprVPN servers are located in places in the world so that you can choose depending on your preference. The current locations include Washington, D.C., Los Angeles, CA and Austin, TX in the United States, London-UK, Amsterdam-Netherlands, Frankfurt-Germany, Paris-France and Hong Kong-Asia.
