Article published on December 22nd 2011 | Technology

For over 30 years DSI has been providing reliable and innovative systems that enable your department to work safely and efficiently. The law Enforcement Module is part of a suite of barcode tracking solutions that include Inventory, Documents, Time and Attendance, Fixed Assets, and ID Badge printer Systems. Bar code data collection has been proven to be the most accurate and efficient method of tracking or counting items.

Checkmate Service Module Improves Safety & Efficiency

DSI has announced the launch of The Checkmate Maintenance Scheduler, targeted for Law Enforcement Agencies who want to reduce the loss of gear and save time tracking down which piece of equipment is checked out to which officer.

The program reports when an inspection is due on items such as laptops, weapons, tasers and vests, and keeps track of the expiration date of consumables such as OC Spray. It is easy to check in and out shotguns and long rifles for every shift. The inventory module will keep track of class B items such as batons, masks, gloves, and handcuffs. Itâ€™s affordable for almost all agencies, even those with just a few employees,â€• stated Bill Allen, Process Control Consultant.

Cost Justification

â€œMisplaced equipment and malfunctioning gear can be a major overhead cost and raises safety concerns for agencies. Our customers see a typical payback for the Equipment Manager within 3-4 months,â€• states Alison Falco, President of Dynamic Systems.
