LG Nitro HD â€“ the Next Chapter in the Cell Phone History

by Javed Khan

Article published on December 19th 2011 | Technology

LG Nitro HD is out in the market. It is yet another new phone from LG, which offers way more than any other cell phone available at the moment. The most outstanding features of the LG Nitro HD are its True HD display and 8 mega-pixel HD camera. Is this truly the next hottest cell phone? Following is a brief analysis of its unique features to help you decide it for yourself.

Operating System:

â€¢ It runs on Android 2.3 Gingerbread with LGâ€™s User Interface running on top of it. This system will get upgraded to the Ice Cream Sandwich next year.

â€¢ It has a 1.5 GHz processor which makes the smooth and fast running of the user interface and the operating system; as a result it is easy to multitask.

â€¢ Availability of Wi-Fi Direct and Wi-Share make photo and file sharing very convenient.

â€¢ Pre installed apps include but are not limited to the following: GMail, Live TV, Movies, Amazon Kindle, Weather, Yellow Pages, Visual Voicemail, Voice Recorder, SmartShare, Talk, Twitter, Google App Suite, YouTube, Application Manager, AT&T Code Scanner, AT&T Navigator and MOG. MOG is a device which has been featured on this phone. It makes it possible to use your album artwork as your wall paper.

â€¢ There are some exciting choices available for wall papers as well.

â€¢ User interface resembles other LG Smart phones but this offers many more additional features.

Hardware:

â€¢ This phone works on AT&Tâ€™s 4G LTE Network. If a user does not have that network coverage it may also work on AT&Tâ€™s HSPA+ Network. Both networks are fairly reliable. The phone has a 1.5 GHz Dual-Core Processor which makes it work way faster than any other phone.

â€¢ It has an inbuilt WiFi, Bluetooth 3.0, Personal Hotspot, accelerometer, proximity sensor and much more.

â€¢ It comes with an 8 mega-pixel HD Camera with an LED Flash at the back. Also, on the back are LG logo and the speaker.

â€¢ In front it has a 1.3 mega-pixel camera, which enhances the quality of video chats.

â€¢ Three android buttons are located under the screen which will take you to the home, menu or back screen.

â€¢ Above the screen is the port to insert an earpiece in.

â€¢ This phone has the capacity to make a video recording in up to 1080 pHD.

â€¢ The phone has its power button, headphone port and USB port at the top.

â€¢ Back cover is nonslip and under the cover is a pre installed battery, AT&T SIM Card and 16GB micro SD card.

Display:

â€¢ This is the first ever phone that offers a full HD Display, which has been made possible with the use of IPS technology.

â€¢ The image resolution is an amazing 1280 X 720 pixels.

â€¢ The size of the display screen is 4.5 inch HD AN-IPS.

â€¢ Colors are true to or even better than real life.

Camera:

â€¢ The 8 mega-pixel camera with LED flash on the back of the phone is one of the most outstanding features this phone has to offer. It is one of the best cameras ever to be made available in a cell phone.

â€¢ Video quality is fantastic as well.

The LG Nitro HD is the next chapter in the age of cell phone revolution. This phone surpasses all the other available phone models in terms of the features and quality it offers. Do check it out if you are looking for a new and upgraded phone. Retail price for the LG Nitro HD is $249.99. It comes with a 2 year contract with AT&T.
