Look Through the iPhone App List and Download the Ones You Like by [Haarry Martin](#)

Article published on July 26th 2012 | [Technology](#)

Now-a-days, we all know iPhone is the best - selling smartphone all over the world. It has been proved to be quite user friendly among the corporate world. An "iPhone" has its unique functionality, which attracts the customer to get crazy for it. It has become the basic necessity, especially for corporate individuals. Utmost feature that attracts the user is its portability and accessibility. iTunes store maintained by Apple is considered to be a digital platform that includes fantastic iPhone apps list. The social networking followers can easily share and control their activity on Facebook, Twitter, Flickr, Picasa, Photobucket, YouTube and many more.

In fraction of seconds, one can check email and access their calendars across the globe. Eventually one can hear forwarded voice mails which are set up in the server from the company network. The iPhone itself portrays its feature playing with email, voicemail and scheduling issues, although not being at work. We always wonder why people always talk about iPhone apps list, but it is just the eye catchy features of the applications offered for the iPhone users. There are thousands of applications available in app store and the amazing fact about it is some of them are free to download. The list of top ten best apps includes social networking, travel, news, weather, photography, productivity, games, maps, etc. It is really surprising to know that among these applications, many of them can be used in iPod touch too. At the release of iPhone 4 we have come across the anecdote about Apple looking forward to deal with Samsung Galaxy S3, but still media is trying to find the proven story with facts and figures on paper.

There are few applications which are considered to be among best news app that is supplementary used by the users. The number of hits and downloads can provide evidence to the usability of the particular application. The theoretical presentation of best news app can be listed as below:

Pulse News for iPad: This application is an extraordinarily useful application which is good for the people who have immense interest in reading, as it cultivates interest in reading and makes the task engaging. Users can remain social too by sharing articles on Twitter and Facebook.

Flipboard: This application is used among the best news app which has a functionality to create a customized newsmagazine containing content. It can also draw links from Twitter and Facebook, thus have a large and interesting data for the users.

The few of the above described applications are among the top ten best app used in the market. These three applications are obtained at free of cost in the application store.
