Article published on March 28th 2012 | Technology

Embarking on a mobile app development journey can be an exciting process. As you navigate a sea of possibilities in terms of probably companies and marketing strategies, you will ultimately be able to see the application that was previously only vibrant in your thoughts come alive on the IPhone screen. Itâ€™s a prospect that can be exhilarating, and itâ€™s one that can also be wrought with confusio Read below to view some of the most frequently asked questions mobile app development rookies ask, and learn a bit more about how the mobile app development process works. Good luck!

â€¢ How do I ensure that my mobile app development team understands exactly what I want my application to look like? Before you can even ask this question, you need to ask yourself what you hope for in terms of this IPhone application. Are you hoping to make money with it? Do you just want to see an idea that youâ€™ve had be available as an application? Share your expectations with the IPhone app development team. They will be able to use your expectations as a model as they design your application to be market competitive. Make certain that the developers understand that the app needs to be easy to navigate and that the colors and fonts need to be clear and aesthetically pleasing. With the thousands of apps available in the IPhone app marketplace, it is absolutely imperative that yours stand out. If it is not user-friendly, it will never gain a following.

â€¢ How will I market my IPhone app? If you have previous experience marketing an IPhone app, you may not need outside help. However, the mobile app development team in charge of making your app come to fruition may well have some marketing ideas for you. Be sure to ask them if they have experience marketing previous IPhone apps, and if possible, talk to their clients. Knowing what to expect will make you feel better about the process and will allow you to work best with your team to put your application out in the best light possible.

â€¢ What if I donâ€™t like the finished product? You should ask your mobile app development team up-front for periodic updates regarding the application. Donâ€™t wait until the final product is released to voice your displeasure. Itâ€™s much easier to tweak an application that is not yet complete than to completely edit a finished one.
