In the last couple of years, from teens to elders, everybody has become habitual to the next generation mobile phones. At present time, Samsung, a leading manufacturer of electronic products has acquired a solid position in the Indian consumer market. Further, the firm has also presented a huge collection of Latest Samsung Mobile Phones that are designed keeping in mind the modern and tech-freak consumers. With each passing day, Samsung has been successful in earning a huge acclamation from all parts of the nation due to the innovative steps it took to manufacture world's most advanced smartphones. In fact, the market share of Samsung has grown tremendously in the last few years. Gone are the days, when Nokia used to rule the market, with its same old OS and designs along with hardly new innovation, Nokia started to lose the charm among the consumers. But at present, it has come up with few smartphones that fall in the Lumia series. Nokia may be a leader in mobile segment, but Samsung has superseded the position of Nokia in the market.

Furthermore, to hold its position as in the market, Samsung has coupled its latest smartphones with sophisticated features, advanced applications and tools. So, if you are in the hunt for the best smartphone, then Samsung offers you with the perfect communicating device. Fully loaded, sleek, stylish and technologically advanced, Samsung cellphones are ruling the market and with the incorporation of latest technologies, these latest mobile phones from Samsung have started competing with Apple's iPhone series. Since the time Samsung stepped in the market with its smartphones, it has always been first choice of the consumers. Keeping this in mind, Samsung has always come up with something exclusive and unbelievable.

Samsung has always been successful in providing the consumers with mobile phones that are perfect the blend of looks, design, innovation and technology. The latest from Samsung is Galaxy S III, which is touted as one of the most advanced smartphone ever developed. Samsung Galaxy S III is made to compete with its opponents like Apple's iPhone, Nokia's Lumia and other top brand's smartphones. Known for its polished features and high end functionality, Samsung Galaxy S III is integrated with Quad-core 1.4 GHz Cortex-A9 processor and runs on Android v4.0.4 (Ice Cream Sandwich) OS. The latest from Samsung is also provided with 8 megapixel camera with LED flash and autofocus. Also provided with 1.9MP front camera, it lets the user communicate their friends and colleagues via video calling. The amazing 4.8 inches Super AMOLED capacitive touchscreen offers the users with excellent touch sensitive controls. Available in blue, purple and marble white colors, S III comes with 16 GB internal storage space, which can be expanded up to 64 GB with the use of microSD card.

So, in the battle, where the warriors are the next generation smartphones, Samsung still holds a strong position in the market. Moreover, with the launch of its latest, Galaxy S III, Samsung will definitely going to win the battle against all odds. Furthermore, time will come when each of us will be holding the Latest Samsung Smartphones and will witness the future with our own eyes. Or, has the time already arrived?
