Tents have been use now for a very long time and have lots of advantages. However, selection on the best tent to use can be a cause of concern and choosing the best type is very important to make sure that you are comfortable with them. The use of tents is very common among people who go on adventure tours, and though they are away from home they would still like to feel the same comfort as if they were are at home.

They are various factors that need to be considered before one decides the type of tents for camping. The first thing that needs to cross your mind before you go for a tent is the size. It is very important to make sure that the size goes hand-in-hand with the use. For the bikers, go for the small tent to make sure that they fit in the small bag or a bike basket and it can be easy to carry. Many families at times decide to go on vocational camping, so it a wise that instead of going for small sized tents for camping for each of the family members, they should opt for one large-sized tent that will provide enough space to accommodate all the family members together. This brings the family together as they spend more time together.

Another thing that you need to take into account is tent weight. You need to make sure that tents are easy carry to along; the equipments that are used in assembling the tent should be lightest. It is also very important to make sure that you select lightest instruments so that it does make you tired and so that it is easier to move from place to place.

Depending on the frequent use of the tent and the place to be used, some people are very keen on the color of their tent. Color is very important on camping sites, more so if you need to blend in with your surroundings. For people who go camping on mountains, green tents for camping are more preferable. For the desert campers, brown and combination of green color are common.

It is very important also while selecting tents to be keen on their ventilation so as to make sure that they provide is enough fresh air inside the tent, and to eliminate chances of suffocation occurring. Most of the cheap tents for camping available in the market today have problem with the fixed ventilation. If a tent is poorly ventilated, it may be possible at night, when humidity is high for condensation to occur, which results in accumulation of large amount of water on top of the tent. Trying to remove this can quite be a hassle and the water might fall inside the tent causing a lot of damage.

Camping site selection should not be overlooked, selecting sites that are not comfortable it may result to getting uncomfortable sleep. Areas that are level and flat are good tent sites. It also important to consider where the sun will rise before you set up you tent. Selection of great tent site is something learned more from experience in camping.
