Sony Cybershot H50 Price in india by Paul Smith

Article published on April 19th 2012 | Technology

The new and impressive Sony Cybershot H50 price is Rs 21550. Most of the Sony digital camera prices in India are listed online on many photography websites. This 15x optical zoom lens camera is optimized to capture distant actions. The lens is so sharp that it can take high-contrast images. There are many collections of Sony Cybershot H50 reviews, but this one is going to crisper and explanatory!

The Sony Cybershot H50 camera is best for shooting even the telephoto ranges, and reduces color fringing. Its advanced shooting modes employ a high shutter speed of up to 1/4000 seconds. This feature is more advanced than the previous models. The combination of high shutter speed and auto-focusing feature, allows the capture of fast moving objects. While taking such pictures, the shutter lag speed is very minimal.

The camera features a 3-inch LCD screen, which allows you to shoot comfortably from any angle. It is scratch resistant, and has a hard coat finish. Its premium looks, acts as a counter for its model. Hence, the Sony Cybershot H50 price is high! The H series cameras of the Sony brand incorporate in-camera editing options that make things easy for users. The users donâ€™t have to spend much time before the computer. On the other hand, they get to spend more time on the location.

Moreover, the dynamic range optimizer, which was developed by the Alpha digital system, allows instant detection of the color tones and exposure. Other interesting features of this camera are the NightShot technology. This helps in capturing pictures in no light. The five color mode options are an impressive one in this camera. The five options include the image management function, color reproduction, in-camera editing, slide show function and HD component output. The latter one is used for viewing photos on a HDTV set that is compatible.

The Sony Cybershot H50 comes with a 15MB internal memory that can be expanded using a memory stick PRO Duo card or a memory stick Duo card. Both these cards can store 16GB. The USB port helps to connect with Mac and Windows computer, and allows faster transfer of movies and images. You can also print these pictures by connecting the Sony Cybershot H50 camera to any compatible PictBridge photo printer.

Overall, this good one to buy! If you are little skeptical, check out the other Sony Cybershot H50 reviews here!
