The BlackBerry Enterprise Server Express: a Thorough Question and Answer Portion

by Samantha Cole

Article published on May 16th 2012 | Technology

The corporate environment is becoming more aggressive, and if you want to survive in this ruthless environment, you have to be able to contend at the same level with the other businesses in the field. Accessing your job whenever, wherever you are, can help you. Fortunately for you, BlackBerry is here to help you do simply that.

A software package provided by BlackBerry, the Enterprise Server lets the personnel of big companies to access their work files, emails, and other work-related applications from their BlackBerry phones. This software is linked to other messaging and collaboration software like several Microsoft applications or the Lotus Domino Server. This helps personnel that are not in the office to manage their emails, book appointments, edit files, and use business applications. Very little companies can pay for this software , and that's why BlackBerry introduced the Enterprise Server Express for smaller businesses.

What does this suggest to small business owners?

The Enterprise Server Express is essentially built to be the little brother of the original Enterprise Server. It is created on the same system, and has most of the same features and functions. Simply, is the price that separates the two. Moreover, the Express version has less client access licenses, which refers to the number of individuals who can use the software.

What applications are backed up by the Express version?

It may be far easier to determine what applications arenâ€™t supported by the Express version compared to those that it does support. A number of premium programs that are available only in the complete version, such as Chalk Pushast software, Enterprise Instant Messaging Clients, and BlackBerry Mobile Voice System, arenâ€™t supported by the Express edition. Besides these, you can do almost anything.

What do I get?

If you buy this software program from a dependable supplier, the typical number of server CALs you will get would be 75, which signifies that 75 people can work with the software once it has been installed. You can also choose to include another 75 to this number if you wish. All you need to do is add a few dollars along with your original purchase.

How does it benefit IT administrators?

The IT department of your company will also be glad to know that they can also acquire over thirty-five IT controls and policies. They can gain access to a server client access license and wipe the phone remotely, or restart the passwords. The original version presents close to 400 IT controls and policies.

You need a trustworthy server with ample server CAL capacity of your business, so why not use this? To learn more, you can visit blogs.blackberry.com/2010/03/blackberry-enterprise-server-express-frequently-asked-questions/ or us.blackberry.com/business/software/besx/.
